Then we will click on generate and it will create a project and then we have to unzip the project:

Create a REST controller to handle requests for all questions:

- **CREATE A NEW DATABASE IN PG ADMIN 4:**

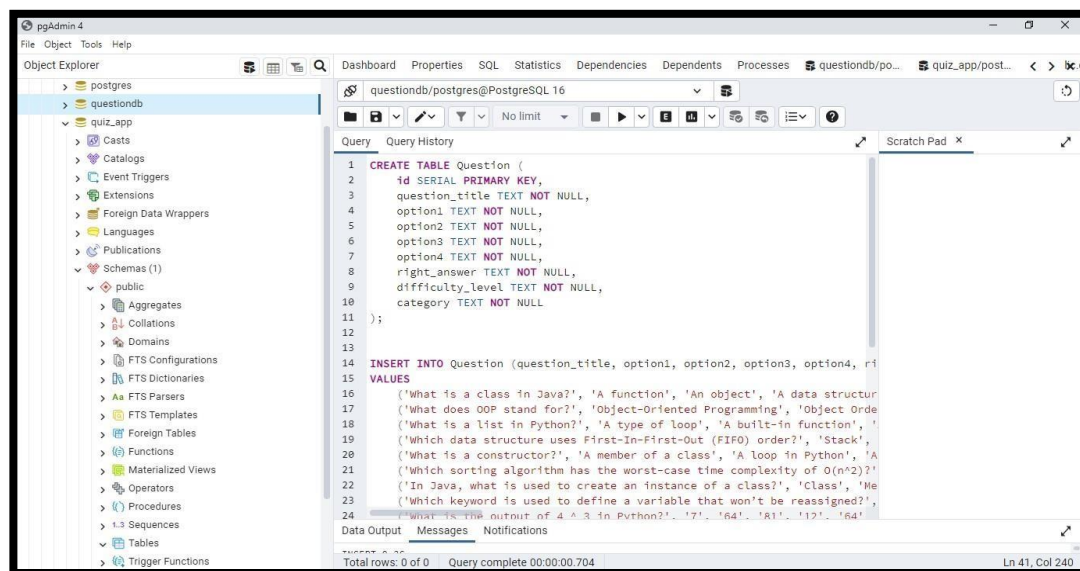

```

1  -- Database: questiondb
2
3  -- DROP DATABASE IF EXISTS questiondb;
4
5  CREATE DATABASE questiondb
6      WITH
7      OWNER = postgres
8      ENCODING = 'UTF8'
9      LC_COLLATE = 'English_United States.1252'
10     LC_CTYPE = 'English_United States.1252'
11     LOCALE_PROVIDER = 'libc'
12     TABLESPACE = pg_default
13     CONNECTION LIMIT = -1
14     IS_TEMPLATE = False;

```

• CREATING TABLES AND INSERTING:

Data Output

Notifications

CREATE TABLE

Query returned successfully in 866 msec.

• SHOW DATA:

Query
Query History

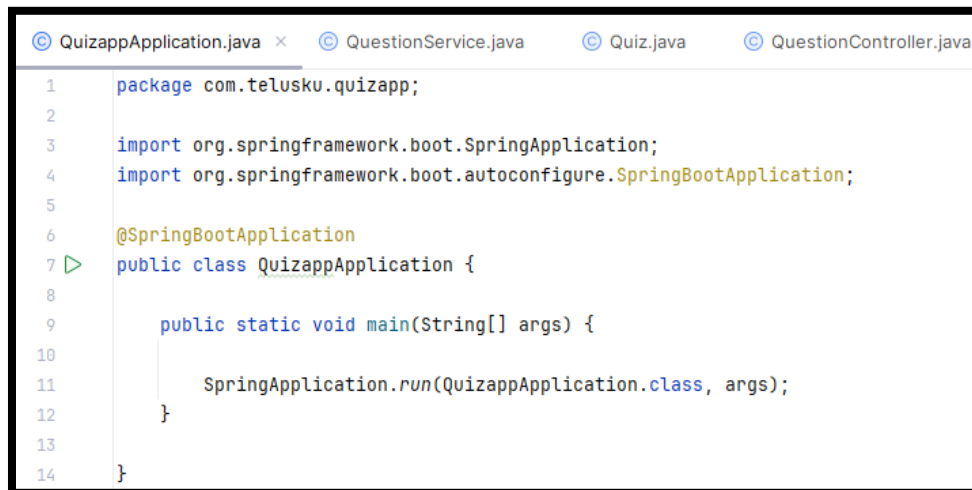

1 SELECT * FROM public.question
2 ORDER BY id ASC

	id [PK] integer	question_title text	option1 text	option2 text
1	1	What is a class in Java?	A function	An object
2	2	What does OOP stand for?	Object-Oriented Programming	Object Ordering Process
3	3	What is a list in Python?	A type of loop	A built-in function
4	4	Which data structure uses First-In-First-Out (FIFO) order?	Stack	Queue
5	5	What is a constructor?	A member of a class	A loop in Python
6	6	Which sorting algorithm has the worst-case time complexity of $O(n^2)$?	Merge Sort	Quick Sort
7	7	In Java, what is used to create an instance of a class?	Class	Method
8	8	Which keyword is used to define a variable that won't be reassigned?	static	final
9	9	What is the output of $4 \wedge 3$ in Python?	7	64
10	10	What does the term "polymorphism" refer to in programming?	Using multiple inheritance	Ability to take multiple forms
11	11	What is the purpose of the 'self' parameter in Python class methods?	It refers to the current instance of the class	It is used to call parent class methods
12	12	Which of the following is not a primitive data type in Java?	int	boolean
13	13	What is the time complexity of a binary search?	$O(n)$	$O(\log n)$

• CONNECTION WITH DATABASE:

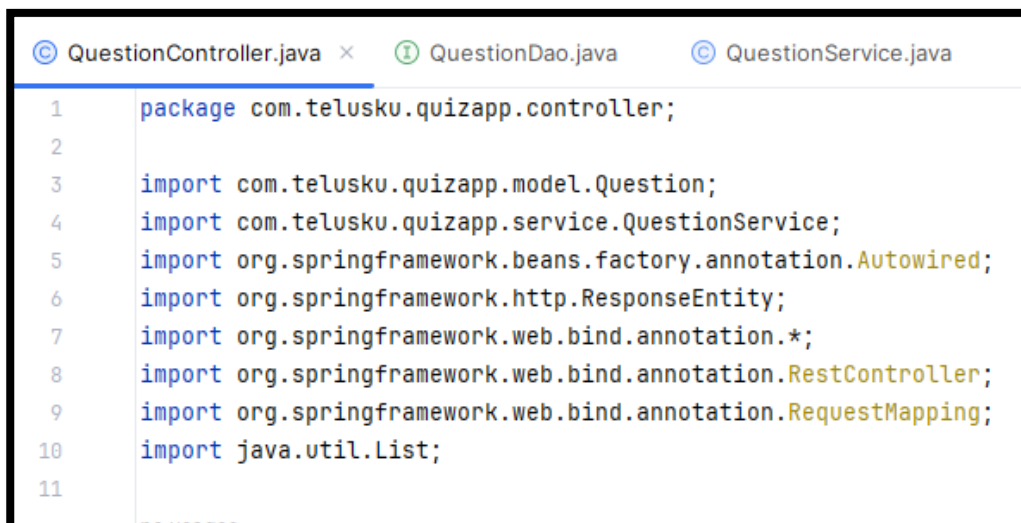

1 spring.datasource.driver-class-name=org.postgresql.Driver
2 spring.datasource.url=jdbc:postgresql://localhost:5432/questiondb
3 spring.datasource.username=postgres
4 spring.datasource.password=bisma
5 spring.jpa.hibernate.ddl-auto=update
6 spring.jpa.properties.hibernate.dialect=org.hibernate.dialect.PostgreSQLDialect
7 spring.jpa.show-sql=true
8

- **CREATING QUIZ APP APPLICATION:**

```
1 package com.telusku.quizapp;
2
3 import org.springframework.boot.SpringApplication;
4 import org.springframework.boot.autoconfigure.SpringBootApplication;
5
6 @SpringBootApplication
7 public class QuizappApplication {
8
9     public static void main(String[] args) {
10
11         SpringApplication.run(QuizappApplication.class, args);
12     }
13
14 }
```

- **GET ALL QUESTIONS:**

```
1 package com.telusku.quizapp.controller;
2
3 import com.telusku.quizapp.model.Question;
4 import com.telusku.quizapp.service.QuestionService;
5 import org.springframework.beans.factory.annotation.Autowired;
6 import org.springframework.http.ResponseEntity;
7 import org.springframework.web.bind.annotation.*;
8 import org.springframework.web.bind.annotation.RestController;
9 import org.springframework.web.bind.annotation.RequestMapping;
10 import java.util.List;
11
```
